- Individual and group follow-up meetings and evaluation process (0,5 ECTS, 12,5 hours)
- Application of ICTs and digital platforms (0.5 ECTS, 12.5 hours)

Evaluation system

All subjects will be assessed by means of the continuous assessment system through which constant feedback is provided on the learning process of the entrepreneur, the team and the company.

Both the degree trainers and the profiles of experts, advisors and mentors actively participate in this assessment process, with the aim of guaranteeing its coherence and validity.

Bearing in mind that in each of the subjects, both individual and team performance will be assessed, the criteria that will govern the assessment system of the degree are as follows:

- individual work can be assessed with evidence that corresponds to a maximum of 30% of the final mark and,
- team work will be assessed with evidence corresponding to at least 70% of the final mark.

The evaluation process will take place twice a year in a dialogue session and the following tools will be used:

1. Evaluation of the team entrepreneurship process in all learning modules. The fulfilment of multiple indicators based on the learning outcomes established in the different modules are analysed and assessed.
2. 360° assessment of competency profile and individual performance. This is a personal self-assessment and co-assessment session with the team and the trainers using different tools that help to assess the skills profile of the qualification within three categories: teampreneur, teamlearner and teamleader. In this session it will be possible to count on the opinion of other agents involved in the learning process such as clients and users.
3. Personal portfolio is a record in which all the necessary documents and data that serve as evidence of the entrepreneur's learning process and results are collected.
